Intercontinental Cairo
City Stars Hotel - Egypt

Welcome

Dear Colleagues,

The Cardiology department of the Military Medical Academy has the honor to invite you to **CardioMilitary2023** that will be held from **25th- 26th January 2023** in **Intercontinental CirtyStars hotel**, Cairo-Egypt.

Over the past decade, the Cardiology department of the Military Medical Academy gained a great experience in executing Cardiology conferences focusing on live transmission to the daily practice of the interventionists inside the cath. labs, associated with its difficulties, emergency situations and complications.

The aim of the organizing committee of **CardioMilitary2023** is to present the percutaneous management of a number of complex and challenging cases in a live atmosphere with the hands of a group of the most distinguished experts in this field to enhance our experience and perceptions inside the cath labs.

In addition to the sector of intervention, we have another sector that will discuss the latest guidelines in different Cardiology fields, the latest landmark trials and the most debated issues in Cardiovascular Medicine.

Moreover, several hands-on workshops are designed to satisfy the growing needs of the young Cardiologists, will be running during the conference days.

Our goal in this conference is to introduce the most advanced techniques in the field of interventional cardiology and the most updated knowledge in the field of general cardiology.

We welcome you towards **CardioMilitary2023**, where we achieve our goals & reach more success together.

Looking forward to seeing you.
